

Statistical Computing - Exercises 06 - Plotting the Olympic Rings

Your task is to draw Olympic Rings using R code. You should try to draw them as closely as possible to how they are pictured in the image below.

Some Notes that may help:

1. It's more complicated than it looks at first sight.
2. Break the problem into repeatable tasks, and write a function.
3. Look into the polygon function.
4. Do the best you can. You may need to approximate some aspects.
